

“KOSOVA E RE”, MORE THAN ENERGY

One of the immediate benefits of the “Kosova e Re” Power Plant is the establishment of the Community Development Fund (CDF) at the amount of 10 Million euro, allocated by the investor ContourGlobal. This fund shall be disbursed from the commencement of construction for a 7 year period. The investor shall contribute 1.5 million euro annually for the first six years, and 1 million in the seventh year.

The CDF shall directly support the community affected by the project. The aim is to help communities improve their social and economic environment, build capacities and involve the community in decision-making processes, contributing in turn to the improvement of their livelihood.

Objectives set forth for the Fund include sustainable community development for over a generation; planned, monitored and assessed development with long term benefits; and support development plans of local governments in education, environment, entrepreneurship and health sectors.

Appointees of the Government and ContourGlobal will select jointly the projects to be funded by the Community Development Fund.
