Kosovo in World Headlines

Since Jan 2018 the Continental European Power System (25 countries from Portugal to Turkey) is experiencing a **continuous power deviations (~130 GWh in total), resulting with system frequency deviation and even 6-min delay of electric clocks in Europe.** Power deviations are originating from this region, specifically Kosovo and control block: Serbia - Montenegro - Macedonia

Kosovo power sector challenges in 2018

Ambitious targets can be achieved only with synergy of all stakeholders.
